SUMMARY

Highly passionate and interest in technology. Experienced in software development process from the concept or problem statement through development and deliver the end product as solution. Capable to work effectively with a different roles and team in dynamic environment. An eager learner who dedicated to improve and maintain tools, also learn new things to maximise productivity so that could get a better result or performance of product.

WORK EXPERIENCES

Frontend Engineer (Full Time Employee)

(September 2022 – November 2023)

PT Feedloop Global Teknologi

- Developed a frontend of AI based application and make sure the experience matches the product design.
- Enhanced and maintained a frontend low-code software development platform on application builder.
- Created a well formatted modular code, perform testing and debugging of application.
- Collaborated with designers, backend engineers, and project manager to implement user friendly and responsive web interfaces.

UI/UX Designer (Internship)

(February 2021 – December 2021)

Apple Developer Academy @BINUS

- Gathered business requirements and problem statements through qualitative and quantitative R&D such as interviews, desk research, and surveys to improve the product quality.
- Constructed multiple solution concepts based on User Personas, Customer Journey Maps, and SCAMPER ideation techniques.
- Ensured the solution concepts are positioned around the customer values and needs by modelling a Value Proposition Canvas and constructing a Competitive Analysis Matrix.
- Designed application interfaces start from wireframe, low to high fidelity prototype design based on Human Interface Guidelines and UI style guide for iOS app using Figma App.
- Practiced and implemented multiple development processes including Scrum, Agile, Design Thinking, and business application analysis.
- Coordinated with an ever-changing team of 5-6 members.
